Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Information Disclosure Statement

The references cited have been considered, and will be listed on any patent resulting from this application since they were provided on a separate list in the Information Disclosure Statement (IDS) Form PTO/SB/08 in compliance with 37 CFR 1.98(a)(1).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 8 –12 and 15-17 are rejected under 35 U.S.C. 102(b) as being Anticipated by Hampton (US patent No. 4,940,062) (Hampton).

With regard to claims 8-12 and 15-17 Hampton discloses (figures 1-12) a catheter steering device, comprising: a main body portion defining a proximal end and a distal end and including a malleable portion between the proximal and distal ends; a deflectable portion associated with the distal end of the main body portion and deflectable relative to the main body portion; and at least one operative element carried by the deflectable portion.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hampton (US patent No. 4,940,062) (Hampton) in view of Pohndorf (US patent No. 4,848,352) (Pohndorf).

With regard to claims 13-14 Hampton discloses the catheter device as claimed in claim 8. However, Hampton does not disclose wherein the at least one operative element comprises electrodes. Pohndorf discloses a catheter with multiple electrodes. Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to combine the steering catheter of Hampton with the electrode sensor catheter disclosed by Pohndorf for measuring electrical signals in the body.

Conclusion

References considered pertinent to Applicants' disclosure are listed on form PTO-892. All references listed on form PTO-892 are cited in their entirety.
